## REVOLUTIONARY PULSATILE PERFUSION CADAVERIC TRAINING

MK Strategy Group leads a pioneering alliance transforming anatomical specimen services and advanced surgical training. In collaboration with Lifeengine, Green Solutions, and Life Tree Anatomical, we deliver unmatched realism for medical training. Together our team provides innovative solutions that go beyond traditional capabilities.

We specialize in fully compliant cadaver procurement services ensuring seamless delivery of training solutions that meet the highest standards.

**"Join us in shaping the future of US Military Medical Education"**

## INTEGRATED CAPABILITIES

### **Enhanced Training Efficiency**

GreenMBalm® Surgical Preservation Fluid extends specimen usability to 8–10 weeks—far surpassing the 1–2 days of fresh frozen cadavers. This enables multiple training sessions while reducing costs and waste.

### **Advanced Perfusion Technology**

Our cutting-edge smart robotic perfusion system that replicates critical hemodynamic parameters, including flow rate, pressure profile, pulsatile rhythm, and temperature control. The system adapts to various configurations (head, limb, or abdomen) for highly realistic surgical training.

### **Environmental Responsibility**

Our certified non-toxic surgical preservation fluid replaces formaldehyde-based solutions, ensuring safer handling, storage, and disposal while advancing sustainability initiatives.

### **Cadaver Procurement Services**

We provide customized specimen preparation tailored to specific training objectives and anatomical requirements, ensuring the highest level of precision and quality.

## PAST PERFORMANCE

## DIFFERENTIATORS

- ❖ Eco-friendly, certified non-toxic tissue preservation with advanced perfusion technology.
- ❖ Strong line of credit, ensuring financial stability for large projects.
- ❖ Combined 60+ years of healthcare leadership & anatomical experience.
